

As a truck driver who depends on good traffic reports I want XM Radio to be allowed to broadcast these. Local stations do a very poor job on reporting traffic problems. They spend much more time on the sponsors message than the traffic report.

Reception of AM stations who carry most of the traffic reports is poor at best, while XM Radio is always available and clear.

XM's reports are also timely and accurate, which seldom occurs with local radio.

Let us keep the freight moving with good traffic reporting as done by XM Radio.
